

Osama Ahmed Fawzy

Software Engineer | Backend .NET Developer

Phone: +201023970604 | Email: osamaahmedx04@gmail.com | Cairo, Egypt

LinkedIn: [linkedin.com/in/osama-ahmed](https://www.linkedin.com/in/osama-ahmed) | GitHub: github.com/OsamaAhmedX04

Objective

Backend .NET Developer with expertise in ASP.NET Core, C#, and EF Core, with a strong focus on performance optimization, application security, and scalable backend architecture. Passionate about building reliable and maintainable software solutions.

Education

Bachelor's Degree in Computer Science

Sep 2022 – Jun 2026

Capital University

GPA: 3.75 / 4.0 | Grade: A

Experience

.NET Developer Intern at Digital Egypt Pioneers Initiative (DEPI)

Jun 2025 – Dec 2025

- Developed a comprehensive ERP system, streamlining core business management.
 - Centralized workflows and provided real-time insight, improving operational efficiency by 15%.
 - Enhanced database design to support inventory, sales, HR, and e-commerce modules.
-

Projects

ProSphere – Creator-Investor Collaboration API | [GitHub](#)

- Built a production-ready API enabling seamless collaboration between creators and investors.
 - Introduced caching mechanisms, reducing response times by up to 60% for frequently accessed data.
 - Implemented pagination to improve performance and user experience with large datasets.
 - Resolved race conditions using optimistic concurrency ensuring 100% data consistency.
 - Improved maintainability and system structure by applying Vertical Slice Architecture with CQRS and clean separation of concerns.
-

Medexa – Healthcare ERP System | [GitHub](#)

- Built a production-ready healthcare ERP system covering hospitals, pharmacies, inventory, suppliers, billing, and patient care.
- Improved appointment and consultation workflows with Zoom meetings and email communication, handling 15+ appointments per doctor per day.
- Strengthened system security with Identity, JWT, OTP, RBAC, and rate limiting.
- Enabled secure and scalable cloud file storage across the application using Supabase.
- Applied Clean Architecture, ensuring maintainable code for 40+ entities.

Optima ERP – Enterprise Resource Planning System | [GitHub](#)

- Contributed to a large-scale ASP.NET Core MVC ERP system, focusing on E-Commerce and Inventory modules, managing products, orders, and stock with full CRUD operations.
- Optimized database schemas across 60+ entities improving query performance.
- Enforced role-based access control using ASP.NET Identity to strengthen system security.
- Refined code structure using a layered architecture and service-based design.

Technical Skills

Backend: C# | ASP.NET Core | MVC | Web APIs | Minimal API | SignalR | Unit Testing

Databases & ORM: SQL Server | MySQL | PostgreSQL | LINQ | Entity Framework Core | ADO.NET

Caching: In-Memory | Redis

Core Concepts: Problem Solving | Data Structures | Algorithms | SOLID Principles | Design Patterns | Agile

Design Patterns: Repository Pattern | Unit of Work | Option Pattern | Result Pattern | Specification Pattern

Architecture: N-Tier | Vertical Slice | Onion Architecture | Clean Architecture | CQRS | MediatR

Version Control: Git | GitHub

Frontend: HTML | CSS | Bootstrap | JavaScript

Soft Skills

Research - Teamwork - Time Management – Communication Skills

Certifications

Full Stack .NET Web Developer, (DEPI) | [Certificate](#)

Business English, (DEPI) | [Certificate](#)
